9 years IT | 7+ years Business Analysis | Immediate joiner

PROFESSIONAL SUMMARY

Senior Business Analyst with 7+ years of experience (9 years in IT) delivering ERP, distribution and supply chain solutions for global FMCG, retail and manufacturing businesses. Experienced across the full BA lifecycle, from requirement workshops, as-is and to-be process mapping, BRDs, SRS and user stories to UAT, go-live and user adoption, working with business and technical teams across countries. Most recently functional lead on a distributor management system rolled out in two countries within one year. Has since upskilled in data analytics (SQL, Power BI) and AI-led process automation.

WORK EXPERIENCE

Personal Sabbatical **May 2026 - Present**

- Took a sabbatical for personal reasons, now fully resolved, and used the time to upskill in data analytics and AI; completed certifications in Power BI, SQL and Omnichannel Retail Strategy.
- Completed 5+ case studies on using AI and automation in processes from previous projects, such as promotion set-up and distributor claim settlement, and built data analytics case studies with SQL and Power BI dashboards.

Specialist - Business Analysis **Apr 2025 - Apr 2026**

LTIMindtree Bengaluru, India

Functional lead for an ERP-integrated Distributor Management System covering order management and outbound logistics for a global FMCG company, serving 80+ distributors, 50,000+ retail outlets and 800+ salesmen across two South-East Asian markets, delivered within one year.

- Ran requirement elicitation workshops with business, product and technical teams in both countries; mapped and benchmarked as-is processes and designed to-be processes for order management, outbound logistics, promotions and claims.
- Reviewed 200+ global user stories for fit in each market, then prepared gap analysis and Key Design Decision (KDD) documents and obtained business sign-off on requirements.
- Captured functional requirements in line with each market's regulatory framework (tax, invoice and credit-note numbering, legal reporting) and wrote around 80 user stories across both markets with Gherkin acceptance criteria (30 legal and fiscal, 50 localisation), traced through the requirements traceability matrix.
- Defined integration requirements and source-to-target mappings across three systems (SAP ERP, the salesman mobile app and a route-optimisation tool for beat planning), and requirements for an ML-based recommendation and KPI module.
- Configured and tested six promotion types (on-invoice and off-invoice), pricing, tax rules and user roles for both markets, and prepared and reconciled master data before deployment.
- Facilitated Scrum events and backlog grooming for a 10+ member cross-functional team, set up a common user story template for four BAs, and used generative AI tools (Microsoft Copilot) to accelerate requirement gathering, analysis and documentation.
- Supported UAT through to business sign-off, led defect triage to separate genuine defects from change requests, raised CRs with impact assessments, and prepared Train-the-Trainer (TTT) material for user training, go-live and hypercare in both markets.

IT Business Analyst **Aug 2023 - Feb 2025**

Sainsbury's London, United Kingdom

- Gathered and prioritised requirements with supply chain, store operations and IT teams to improve Warehouse Execution System (WES) workflows, translating them into user stories and acceptance criteria.
- Ran process walkthroughs and user-journey mapping with store teams, and documented as-is and to-be workflows and functional requirements for the delivery teams.
- Defined requirements for a WES redesign with real-time data synchronisation to SAP ERP, reducing manual stock reconciliation effort by ~30%.
- Analysed inventory and stock-accuracy reports with supply chain teams to trace root causes, contributing to a ~15% reduction in stock discrepancies.

Specialist Business Analyst **Jan 2021 - Sep 2022**
Birlasoft Pune, India

- Led functional delivery of MahaParwana, a digital agriculture licensing and inventory platform serving 30,000 businesses and 13.6 million farmers.
- Wrote BRD and SRS documents and UAT test scenarios and scripts, modelled processes in BPMN and UML, and defined conceptual and logical data models.
- Owned the product backlog and led backlog grooming, built clickable UI/UX mock-ups, facilitated Scrum ceremonies, and contributed to RFI, RFP and RFQ responses.
- Automated licence processing and streamlined inventory management, cutting licence turnaround time by ~60%. The platform won a SKOCH Award in 2022.

Business Analyst **Jul 2018 - Jan 2021**
The Opal Labs Pune, India

- Led delivery of a Dealer Management System (DMS) and billing system for a global tractor manufacturer's network of 500+ dealers, covering sales orders, procurement, inventory and service.
- Gathered requirements across the pre-sales, sales, procurement, service and marketing modules and translated them into BRD and SRS documents, including data and API integration requirements.
- Optimised report generation, cutting report turnaround time by ~50%.

Quality Analyst **Jun 2016 - Jun 2018**
RSE LegalDocs Navi Mumbai, India

- Tested rent-agreement and licence-registration portals (functional and integration testing), finding and resolving 100+ defects before release in a 13-member team.

CORE SKILLS

BA Skills	Requirements Elicitation · Stakeholder Workshops · BRD / FRD / SRS · User Stories & Acceptance Criteria (Gherkin) · Use Cases · As-Is / To-Be Process Mapping · Process Benchmarking · Gap Analysis · Key Design Decisions (KDD) · Change Impact Analysis · Requirements Traceability (RTM) · Scope Management · Backlog Grooming & Prioritisation · UAT Test Scenarios & Sign-off · Defect Triage · Business Cases · RFI / RFP Responses
Domain	ERP & Distributor Management Systems · Order Management & Outbound Logistics · Order-to-Cash · Trade Promotions & Claims · Sales Force Automation · Warehouse & Supply Chain · Retail · Dealer Networks
Data & AI	SQL · Power BI · Advanced Excel · KPI Dashboards · ML-based Recommendations · AI Process Automation · GenAI Tools (ChatGPT, Claude, Copilot)
Tools	Jira · Confluence · MS Visio · Figma · Postman · SAP ERP Integration · APIs
Methodologies	Agile · Scrum · Kanban · SAFe · Waterfall · SDLC

EDUCATION

M.Sc. Business Analytics | University of Surrey, United Kingdom | Sep 2022 - Sep 2023
B.E. Computer Engineering | Savitribai Phule Pune University, India | May 2011 - May 2016

CERTIFICATIONS & AWARDS

- Professional Scrum Master I (PSM-I) - Scrum.org, 2020
- Power BI - Microsoft Learn, Sep 2026
- Intro to SQL - Kaggle Learn, Aug 2026
- Omnichannel Retail Strategy - Coursera, Aug 2026
- SKOCH Award (2022) - MahaParwana platform, Birlasoft
