9 years IT | 7+ years Business Analysis | Immediate joiner

PROFILE

Senior Business Analyst and Product Owner with 7+ years delivering Distributor and Dealer Management Systems for FMCG and channel-driven businesses. Most recently functional lead on a global FMCG multinational's DMS across Cambodia and Laos (80+ distributors, 50,000+ retail outlets), cutting distributor claim settlement from ~30 to ~10 days. Strong in order-to-cash, trade promotions and claims, pricing, master data and SAP integration, with UK retail supply-chain experience at Sainsbury's.

CORE EXPERTISE

Domain: FMCG route-to-market, Distributor Management Systems (DMS), Dealer Management Systems, order-to-cash, trade promotions and claims, pricing and master data, retail supply chain, inventory management

BA & Product: BRD/SRS/FRD, user stories and acceptance criteria, gap analysis, BPMN/UML process modelling, RTM, MoSCoW, backlog ownership, UAT, change requests

Systems & Tools: SAP (U2K2) integration, TPM, PEGA, WES, field mobility apps, API integration, Jira, Confluence, Figma, MS Visio, SharePoint

Reporting & AI: SQL reporting, Power BI dashboards and visualisation, Advanced Excel, KPI definition, AI tools for documentation (ChatGPT, Claude, Copilot)

Delivery: Agile (Scrum, Kanban), SAFe, Waterfall, sprint planning, backlog refinement, go-live and hypercare

EXPERIENCE

Freelance Functional Consultant | FMCG Distribution & DMS

Apr 2026 – Present

Pune, India

- Providing functional consulting on distributor management, order-to-cash, trade promotion and claims processes, and building an FMCG distribution and DMS advisory offering covering distributor onboarding, claims and promotions.

Specialist – Business Analysis | LTIMindtree

Apr 2025 – Apr 2026

India (client markets: Cambodia, Laos)

Functional delivery lead for the Distributor Management System of a global FMCG multinational across two South-East Asian markets.

- Led requirement gathering and market-alignment workshops with client business, product, technical and market stakeholders across two countries.
- Mapped market-specific gaps across order-to-cash, returns, pricing, promotions, claims, targets, legal reporting and master data (distributor, outlet, product, geography, salesman).
- Owned localisation and integration requirements – tax, invoice and credit-note numbering, promotion logic, pricing, claims settlement and legal reporting – with data flows across SAP (U2K2), TPM, PEGA and mobility apps.
- Streamlined promotion configuration and claim settlement, cutting the average distributor claim settlement cycle from ~30 days to ~10 days within the client's promotional governance.
- Built SQL reports and Power BI dashboards on historical sales, promotion and claims data to support requirement workshops with evidence.
- Wrote user stories, acceptance criteria, process flows, functional specifications and field mappings; maintained the RTM and prioritised the backlog with stakeholders using MoSCoW, using AI tools to speed up workshop summaries and first drafts.
- Delivered a solution serving 80+ distributors, 50,000+ retail outlets and 800+ salesmen with real-time visibility of sales, promotions and inventory; coordinated UAT, change requests, go-live and hypercare.

IT Business Analyst | Sainsbury's

Aug 2023 – Feb 2025

United Kingdom

Requirements and process analysis across retail supply chain, inventory management and store operations.

- Gathered and prioritised requirements with supply chain, store operations and IT teams to improve Warehouse Execution System (WES) workflows, translating them into user stories and acceptance criteria.
- Defined requirements for a WES redesign enabling real-time data synchronisation with SAP, reducing manual stock reconciliation effort by ~30%.
- Ran process walkthroughs and user-journey mapping with store teams, turning workflow breakpoints into prioritised WES backlog items.

- Reviewed inventory and stock-accuracy reports with supply chain teams to trace root causes of recurring reconciliation issues, contributing to a ~15% reduction in stock discrepancies.
- Documented as-is and to-be workflows and functional requirements for supply chain and IT delivery teams.

Specialist Business Analyst | Birlasoft

Jan 2021 – Sep 2022

India

MahaParwana agriculture licensing and inventory platform, delivered under an Agile framework.

- Led functional delivery of a centralised digital licensing and inventory platform serving 30,000 businesses and 13.6 million farmers.
- Owned and refined the product backlog, produced UI/UX mock-ups, facilitated sprint planning, stand-ups and retrospectives, and secured stakeholder sign-off.
- Modelled processes with BPMN and UML and defined conceptual and logical data models for the platform.
- Used licence and inventory reports to pinpoint processing bottlenecks, then streamlined inventory management and automated licence processing, cutting licence turnaround time by ~60%.
- Platform recognised with a SKOCH Award (2022) for operational efficiency.

Business Analyst | The Opal Labs

Jul 2018 – Jan 2021

India

Dealer Management and billing systems for a country-wide dealer network.

- Led delivery of an integrated Dealer Management System for 500+ dealers, improving inventory planning and sales order processing.
- Translated business requirements into BRD and SRS documents, including data and API integration requirements for scale and performance.
- Built reports on dealer sales and inventory to surface ordering patterns, shaping inventory planning and reporting requirements.
- Optimised report generation, cutting report turnaround time by ~50% and improving error tracking through performance dashboards.

Quality Analyst | RSE LegalDocs

Jun 2016 – Jun 2018

India

- Functional and integration testing for rent-agreement and licence-registration portals; identified and resolved 100+ defects before deployment in a 13-member team.

EDUCATION

M.Sc. Business Analytics | University of Surrey, United Kingdom

Sep 2022 – Sep 2023

B.E. Computer Engineering | Savitribai Phule Pune University, India

May 2011 – May 2016
